SKILLS

Programing Languages:	Python	Java	Kotlin	C++
Framework or platform:	Django	Spring		
Tools or software:	Git	Linux		
Database:	MySQL	PostgreSQL		

EXPERIENCE

- 2018.09-2019.06 Maintain a system by PHP**
At the request of teachers, the educational administration management system is developed.
My main job is to operate and maintain the website. And I mastered the operation and maintenance of general website.
- 2019.06-2019.08 Develop a website for a community**
When we welcome new members, we need a publicity website.
My main job is to develop a background processing program. I understood and learned the web technology in the back-end processing technology preliminary.
- 2019.09-2020.05 Academic research**
Research on the prediction of solar activity based on sunspot images.
My main job is to process data, standardizing and providing clean consolidated data. During this period, I learned about the process of data processing and the AI framework used to process data.
- 2019.09-2020.05 Lead a project**
This is a application of 3D vision technology in real life.
My main job is organization, reappearance, application, explanation and soon in order to be a leader of a project. And I learned new 3D image processing technology - 3D structured light technology.
- 2020.12-now Lead a system development task**
Under the entrustment of the relevant departments of the school, we are developing a comprehensive system for the management of students.
My main job is develop the back-end system with another developer and lead the task. I mastered the mature back-end framework—Ruoyi.

PROGRAMMING

Java

C++

Python

Kotlin

OPEN SOURCE SPIRT

- 2020.09-now Host of "VSCODE"**
In love with open source project, I took part in the activities of VsCode Chinese Community in my spare time and hosted the open source sharing meeting as the host.
- 2020.09-now My own open source project**
When I lead a system development task, I find a open source project called "RuoYi" missing PostgreSQL support. On the basis of it, I found the shortcomings of the system and opened my own project called "Ruoyi-Vue-PostgreSQL" displayed by the original author on the website home page now.

EDUCATION

Bachelor of Software Engineering

University of Jiangsu University of Science and Technology

2018.09-2022.06
